APPROVAL OF STATE ENGINEER

This is to certify that I have examined the foregoing application, and do hereby grant the same, subject to the following limitations and conditions:

This permit is issued subject to all prior rights on the source, and is issued in conjunction with permit No. 5607, a portion of the same land being proposed to be irrigated under both filings. The amount of water herein granted is placed at the full statutory allowance of 1.8 cubic feet per second for the 180 acres proposed to be irrigated, so that such amount of water may be diverted and used in the event that there is no water available in the source described in permit No. 5607. However, the total amount of water which may be diverted from the combined sources described in these two filings must not exceed 1.8 cubic feet of water per second, or the statutory allowance for the maximum acreage of land proposed to be irrigated under both filings. The applicant will be required at the time of filing proof of beneficial use of water to definitely segregate the areas of land which obtain water for irrigation purposes from each source described in these two permits.

A substantial headgate and weir must be installed at or near the point of diversion to facilitate the measurement and control of water.

The State reserves the right to regulate the use of the water herein granted at any and all times.

It is distinctly understood that the applicant agrees to the terms herein contained.

December 17, 1924 Proof of the application of water to beneficial use must be filed with State Engineer on or before January 17, 1925

Proof of Beneficial Use AUG - 2 1922 WITNESS MY HAND AND SEAL this 17th day

November, 1920.

Cancelled Dec 2, 1922

applicant to comply with provisions of permit.

Robert A. Allen

State Engineer.
